Terms of Service

Rules and expectations for using the Lakeside SIS portal

Please read before signing in. By accessing or using Lakeside SIS, you agree to these terms. If you do not agree, do not use the portal.

1. Purpose and scope

These Terms govern your use of Lakeside SIS, a website and student-information portal operated for the Lakeside Roblox school roleplay community. References to students, teachers, classes, grades, attendance, discipline, fees, and school records refer to the roleplay environment unless expressly stated otherwise. Lakeside SIS is not an official school district information system and must not be used for real-world education, medical, financial, or other sensitive records. Roblox and any third-party services used with the portal are governed by their own terms and policies.

2. Eligibility and Roblox sign-in

You must be eligible to use the Roblox sign-in method offered by the portal and must follow Roblox's applicable terms and community standards. Sign in only with an account you own or are authorized to use. Authentication is handled through Roblox; Lakeside SIS should not ask you to provide your Roblox password directly. You are responsible for keeping your account and devices secure, signing out on shared devices, and promptly reporting suspected unauthorized access.

3. Accounts, roles, and permissions

Your access is based on the role, assignments, and permissions configured by Lakeside SIS administrators. A successful website sign-in does not automatically make you a teacher, staff member, or administrator, and does not authorize you to view or change records outside your assigned responsibilities. Do not share accounts, impersonate another user, attempt to elevate your permissions, or use another person's session. Administrators may correct roles and revoke access when necessary.

4. Acceptable use

Use the portal only for its intended school roleplay purposes. You must not: access, alter, export, or disclose records without authorization; falsify grades, attendance, submissions, balances, or staff actions; interfere with the portal or its connected services; probe, bypass, or defeat security controls; send malicious code or abusive automated requests; harass, threaten, or impersonate others; or use the service to violate laws, Roblox rules, or community rules. Do not upload real-world sensitive information, passwords, account secrets, or content you do not have permission to share.

5. Student work, messages, and school records

You retain any rights you hold in content you create and submit. By submitting work, messages, or other material, you give the portal operators permission to host, store, display, and process that material as reasonably needed to operate the classroom and SIS features. Submit only material you are allowed to share. Authorized teachers and staff may review submissions, provide feedback, and enter roleplay grades or attendance in accordance with their assigned permissions. Users with staff access must use it responsibly and review entries for accuracy before saving or publishing them.

6. Records, corrections, and user responsibility

Portal records may be incomplete, delayed, or affected by synchronization issues. Check the relevant record before repeating an action that appears to have timed out, since a request may have been processed even if the page did not display confirmation. Report suspected errors, duplicate entries, inappropriate content, or unauthorized changes to a Lakeside SIS administrator. Do not attempt to correct records by accessing someone else's account or bypassing normal permissions.
